

Os 100 maiores filmes de Ficção Científica (Sci-Fi)

17/08/2007 · [Imprima este artigo](#)

O site DigitalDreamDoor's publicou [uma lista com os 100 maiores filmes de ficção científica](#) já produzidos. O critério desta lista parece ser o gosto do [autor](#) já que não publicaram nenhuma informação sobre o que classificaria um filme melhor que outro. Em nenhuma, das dezenas de listas que há no site, eles colocam qual critério foi utilizado. Eu não discordo da [lista](#) onde The Godfather é considerado o melhor filme de todos os tempos, mas dizer, já em [outra lista](#), que Steven Spielberg é melhor diretor que [Ingmar Bergman](#) ou Francis Ford Coppola é demais.

2001: Uma odisséia no espaço, 2001: A Space Odyssey em inglês, do diretor Stanley Kubrick levou a melhor na disputa do troféu da categoria. Em seguida aparecem Star Wars episódio V e IV. Pra minha frustração, Arquivo-X só aparece na vigésima nona posição, sendo considerado pior que Man in Black. Duna, outro filme de ficção científica que adoro, aparece vergonhosamente ao lado do número 54. Depois deste absurdo parei de ler esta lista.

Apesar de não concordar, reproduzo a lista aqui. No site há mais um montão de listas deste tipo.

1. 2001: A Space Odyssey – (1968) (Keir Dullea, Gary Lockwood)
2. Star Wars: Ep.V – The Empire Strikes Back – (1980) (Mark Hamill, Carrie Fisher, Harrison Ford)
